Foreword	11
Summary of Key Points	13
INTRODUCTION	21
The structure of this book	27
Part 1 - The Current Monetary System	29
1. A SHORT HISTORY OF MONEY	33
1.1 The origins of money	33
<i>A textbook history</i>	33
<i>The historical reality</i>	35
1.2 The emergence of banking	38
2. THE CURRENT MONETARY SYSTEM	47
2.1 Commercial (high-street) banks	47
2.2 The Bank of England	50
2.3 The business model of banking	53
<i>Understanding balance sheets</i>	53
<i>Staying in business</i>	56
2.4 Money creation	59
<i>Creating money by making loans to customers</i>	60
2.5 Making electronic payments between customers	62
2.6 Money destruction	68
2.7 Liquidity and central bank reserves	70
<i>How central bank reserves are created</i>	70
<i>How commercial banks acquire central bank reserves</i>	71
2.8 Money creation across the whole banking system	75
<i>The money multiplier model</i>	75
<i>Endogenous money theory</i>	78

3. WHAT DETERMINES THE MONEY SUPPLY?	81
3.1 The demand for credit	82
<i>Borrowing due to insufficient wealth</i>	82
<i>Borrowing for speculative reasons</i>	84
<i>Borrowing due to legal incentives</i>	85
3.2 The demand for money	85
<i>Conclusion: the demand for money & credit</i>	87
3.3 Factors affecting banks' lending decisions	88
<i>The drive to maximise profit</i>	88
<i>Government guarantees, deposit insurance & 'too big to fail'</i>	89
<i>Externalities and competition</i>	94
3.4 Factors limiting the creation of money	95
<i>Capital requirements (the Basel Accords)</i>	95
<i>Reserve ratios & limiting the supply of central bank reserves</i>	97
<i>Controlling money creation through interest rates</i>	100
<i>Unused regulations</i>	108
3.5 So what determines the money supply?	109
<i>Credit rationing</i>	110
<i>So how much money has been created by banks?</i>	114
4. ECONOMIC CONSEQUENCES OF THE CURRENT SYSTEM	115
4.1 Economic effects of credit creation	116
<i>Werner's Quantity Theory of Credit</i>	117
<i>How asset price inflation can fuel consumer price inflation</i>	127
4.2 Financial instability and 'boom & bust'	128
<i>Minsky's Financial Instability Hypothesis</i>	129
<i>The bursting of the bubble</i>	133
4.3 Evidence	139
<i>Financial crises</i>	140
<i>Normal recessions</i>	145
4.4 Other economic distortions due to the current banking system	147
<i>Problems with deposit insurance & underwriting banks</i>	149
<i>Subsidising banks</i>	151
<i>Distortions caused by the Basel Capital Accords</i>	153
5. SOCIAL AND ENVIRONMENTAL IMPACTS OF THE CURRENT MONETARY SYSTEM	155
5.1 Inequality	155
5.2 Private debt	158

5.3 Public debt, higher taxes & fewer public services	159
5.4 Environmental impacts	160
<i>Government responses to the boom bust cycle</i>	160
<i>Funding businesses</i>	162
<i>Forced growth</i>	163
5.5 The monetary system and democracy	165
<i>Use of 'our' money</i>	165
<i>The misconceptions around banking</i>	166
<i>The power to shape the economy</i>	167
<i>Dependency</i>	169
<i>Confusing the benefits and costs of banking</i>	170
 Part 2 - The Reformed Monetary System	 173
6. PREVENTING BANKS FROM CREATING MONEY	175
6.1 An overview	176
6.2 Current/Transaction Accounts and the payments system	178
6.3 Investment Accounts	182
6.4 Accounts at the Bank of England	184
<i>The relationship between Transaction Accounts and a bank's</i>	
<i>Customer Funds Account</i>	186
6.5 Post-reform balance sheets for banks and the Bank of England	188
<i>Measuring the money supply</i>	188
6.6 Making payments	190
1. <i>Customers at the same bank</i>	191
2. <i>Customers at different banks</i>	191
<i>A note on settlement in the reformed system</i>	192
6.7 Making loans	193
<i>Loan repayments</i>	196
6.8 How to realign risk in banking	197
<i>Investment Account Guarantees</i>	197
<i>The regulator may forbid specific guarantees</i>	199
6.9 Letting banks fail	200
 7. THE NEW PROCESS FOR CREATING MONEY	 203
7.1 Who should have the authority to create money?	203
7.2 Deciding how much money to create: The Money Creation Committee (MCC)	204
<i>How the Money Creation Committee would work</i>	207

<i>Is it possible for the Money Creation Committee to determine the 'correct' money supply?</i>	208
7.3 Accounting for money creation	210
7.4 The mechanics of creating new money	211
7.5 Spending new money into circulation	211
<i>Weighing up the options</i>	213
7.6 Lending money into circulation to ensure adequate credit for businesses	215
7.7 Reducing the money supply	217
8. MAKING THE TRANSITION	219
<i>An overview of the process</i>	219
8.1 The overnight 'switchover' to the new system	220
<i>Step 1: Updating the Bank of England's balance sheet</i>	220
<i>Step 2: Converting the liabilities of banks into electronic state-issued money</i>	227
<i>Other Changes</i>	228
<i>Step 3: The creation of the 'Conversion Liability' from banks to the Bank of England</i>	228
8.2 Ensuring banks will be able to provide adequate credit immediately after the switchover	231
<i>Funds from customers</i>	231
<i>Lending the money created through quantitative easing</i>	231
<i>Providing funds to the banks via auctions</i>	232
8.3 The longer-term transition	233
<i>Repayment of the Conversion Liability</i>	233
<i>Allowing deleveraging by reducing household debt</i>	233
<i>Forcing a deleveraging of the household sector</i>	234
9. UNDERSTANDING THE IMPACTS OF THE REFORMS	241
9.1 Differences between the current & reformed monetary systems	241
9.2 Effects of newly created money on inflation and output	241
9.3 Effects of lending pre-existing money via Investment Accounts	246
<i>Lending pre-existing money for productive purposes</i>	246
<i>Lending pre-existing money for house purchases and unproductive purposes</i>	247
<i>Lending pre-existing money for consumer spending</i>	249
9.4 Limitations in predicting the effects on inflation and output	250

9.5 Possible financial instability in a reformed system	251
<i>A reduced possibility of asset price bubbles</i>	252
<i>Central bank intervention in asset bubbles</i>	254
<i>When an asset bubble bursts</i>	256
9.6 Debt	259
9.7 Inequality	260
9.8 Environment	261
9.9 Democracy	263
10. IMPACTS ON THE BANKING SECTOR	265
10.1 Impacts on commercial banks	265
<i>Banks will need to acquire funds before lending</i>	265
<i>The impact on the availability of lending</i>	267
<i>Banks will be allowed to fail</i>	269
<i>The 'too big to fail' subsidy is removed</i>	270
<i>The need for debt is reduced, shrinking the banking sector's balance sheet</i>	271
<i>Basel Capital Adequacy Ratios could be simplified</i>	271
<i>Easier for banks to manage cashflow and liquidity</i>	272
<i>Reducing the 'liquidity gap'</i>	273
10.2 Impacts on the central bank	274
<i>Direct control of money supply</i>	274
<i>No need to manipulate interest rates</i>	274
<i>A slimmed down operation at the Bank of England</i>	274
10.3 Impacts on the UK in an international context	275
<i>The UK as a safe haven for money</i>	275
<i>Pound sterling would hold its value better than other currencies</i>	276
<i>No implications for international currency exchange</i>	277
<i>Would speculators attack the currency before the changeover?</i>	277
10.4 Impacts on the payment system	111
<i>National security</i>	277
<i>Opening the door to competition among Transaction Account providers</i>	278
11. CONCLUSION	279

Part 3 - Appendices **285**

APPENDIX I - EXAMPLES OF MONEY CREATION BY THE STATE: ZIMBABWE VS. PENNSYLVANIA **287**

<i>Zimbabwe</i>	288
<i>Other hyperinflations</i>	296
<i>Pennsylvania</i>	297
<i>Conclusions from historical examples</i>	302

APPENDIX II - REDUCING THE NATIONAL DEBT **303**

<i>What is the national debt?</i>	303
<i>Who does the government borrow from?</i>	303
<i>Does government borrowing create new money?</i>	304
<i>Is it possible to reduce the national debt?</i>	305
<i>Is it desirable to reduce the national debt?</i>	306
<i>Paying down the national debt in a reformed monetary system</i>	309
<i>Is this 'monetising' the national debt?</i>	310

APPENDIX III - ACCOUNTING FOR THE MONEY CREATION PROCESS **311**

<i>The current 'backing' for banknotes</i>	311
<i>The process for issuing coins in the USA</i>	313
<i>The key differences between US coins and UK notes</i>	314
<i>The post-reform process for issuing electronic money</i>	315
<i>Ensuring that electronic money cannot be forged</i>	315
<i>Reclaiming seigniorage on notes & electronic money</i>	316
<i>Modernising the note issuance</i>	316
<i>An alternative accounting treatment</i>	317
<i>Balance sheets: alternative treatment (with money as a liability of the Bank of England)</i>	321
